PERSONAL BACKGROUND

I am a software and DevOps engineer at [Bitergia](#) who loves to automate boring and time-consuming tasks. I love Python, MySQL and Elasticsearch technologies

PROFESIONAL SKILLS

Python, JavaScript, ADA, JAVA
Django
GitHub, GitLab
GNU/Linux
Kanban method
MariaDB, MySQL, Elasticsearch
Docker

LANGUAGES

MY INTERESTS

New technologies
Open Source methodologies
Paddle, Soccer, Games
Movies

QUAN ZHOU

DevOps specialist

WORK EXPERIENCE

DevOps Engineer

[Bitergia](#). | Sep 2015 - Present day

- I develop, deploy and provide support with the [GrimoireLab](#) toolkit. Mainly focused on dashboards generation, their maintenance and all the chain that produces them. I collect the information, I generate the metrics based on that information and I visualize it on the dashboard.

- I participated in events and conferences, such as FOSDEM (2016, 2017, 2018, 2019, 2020), GrimoireCon (2016, 2017), and CHAOSSCon (2018, 2019, 2020).

Researcher Assistant

Rey Juan Carlos University. | Mar 2015 - Sep 2015

- As part of LibreSoft research group, I was focused on data visualization tools and I developed an application to plot data using different open source libraries.

PROJECTS

Q-DashMan (link)

Q-DashMan helps you to create dashboards with [GrimoireLab](#) in a simple way to understand the health of your open source software project. Used technologies: Python, Docker, Django, MariaDB.

ACADEMIC BACKGROUND

Master's Degree in Telecommunication Engineering

Rey Juan Carlos University - 2018

Bachelor's Degree in Telecommunication Engineering

Rey Juan Carlos University - 2015
